

# SMARTCOLOR CLEANING SYSTEM

Apply your choice of **SmartColor** decals to tools to designate cleaning areas or tasks.

## SMARTCOLOR RECOMMENDED USAGE GUIDE

### SANITARY RESTROOM

Use red in areas of the restroom that have higher bacteria concentrations and specialized cleaning solutions where sanitation is a priority, particularly toilets and urinals.

### SPECIALTY CLEANING

Use yellow for sinks and general restroom cleaning to prevent cross-contamination from toilet and urinal areas.

### FOODSERVICE AREAS

Use green in areas that come into contact with food, including kitchens, cafeterias and employee break rooms. Or, use a separate color for food preparation areas for an added degree of safety.

### GENERAL/USER SPECIFIC

Use blue for general cleaning in offices, hallways and reception areas. Or, task a set of tools for specialized areas of your building, such as hotel rooms, classrooms, manufacturing areas or medical facilities.

## VISUALIZE THE DIFFERENCE COLOR CAN MAKE

The SmartColor Cleaning System combines Unger's superior cleaning technology with the productivity and sanitation benefits of visual coding. For the first time, our ergonomic cleaning products are available with color-coded enhancements that help your employees easily organize both their equipment and workday. The results are improved performance, better sanitation and cleaner facilities.

## DIFFERENT NEEDS — ONE FLEXIBLE SOLUTION

SmartColor achieves its distinct color-coding through interchangeable features and durable decals. This gives you the flexibility to easily retask tools for different areas or functions as required.

## ADVANTAGES OF SMARTCOLOR

### IMPROVES TRAINING AND COMMUNICATION

- SmartColor is an intuitive visual coding system, removing language and literacy barriers when training a diverse workforce.
- Color-coding also provides supervisors with quick visual indicators for monitoring employee activity to prevent tool or chemical misuse.

### PREVENTS CROSS-CONTAMINATION

- Distinct color-coding makes it easy to separate tools into their correct areas of use. Restroom tools are kept in the restroom, kitchen tools are kept in the kitchen – reducing bacteria cross-contamination between high- and low-risk areas.
- Proper use creates a healthier, more sanitary environment that benefits employees, occupants and visitors.

### DETERS CHEMICAL MISUSE & PRESERVES FACILITY ASSETS

- SmartColor reduces the transfer of harmful substances by isolating potentially hazardous cleaning chemicals into their appropriate areas.
- SmartColor protects valuable assets by reducing the risk of using improper chemicals or applications on floors and other surfaces.
- Floor-finishing supplies can be color-coded to eliminate confusion with floor-stripping supplies to preserve the appearance of high-priced specialty flooring.

### ELEVATES EMPLOYEE PERFORMANCE

- SmartColor enhances the professional appearance of employees and increases their efficiency by making it easy to organize the cleaning process.
- Ergonomic tool design also reduces fatigue and injury to boost productivity.

# RESTROOM CLEANING PRODUCTS

	ITEM	PRODUCT #	SIZE	DESCRIPTION
<b>BUCKETANDPRESS</b>				
	Red Bucket	COMBR	8Gal/30L	<ul style="list-style-type: none"> <li>• 8 gallon/30 liter total capacity Dual Bucket System.</li> <li>• Two 4-gallon compartments keep clean and dirty rinse water separate to prevent cross-contamination.</li> <li>• Press accommodates flat mop or conventional string mop.</li> </ul>
