HANTOVER[®]
The Complete Industrial Distributor™

KC1000

Smart, Green, Economical

Kimberly-Clark Professional's exclusive CTAD Technology improves the absorbency of their cleaner, greener towels. That, coupled with their Balanced Fiber approach (recycled fibers, new fibers and high-yield fibers) ensures superior-performing, environmentally friendly towels.

**Absorbency and dispensability =
less waste and cleaner restrooms**

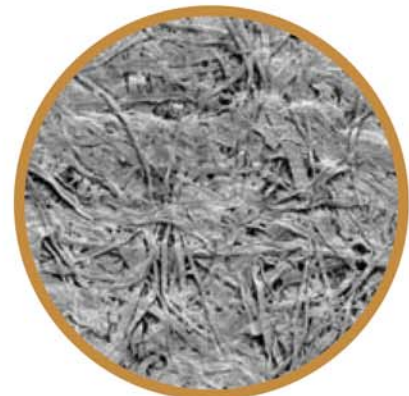

- Absorbs more with fewer towels
- Most competitively priced roll towel on the market
- Works with Hands Free Dispenser for HACCP Compliance
- Faster absorption than competitors

UCTAD Technology with Absorbency Pockets.
Patented Absorbency Pockets are created through a special process that opens up the fibers allowing fewer fibers to absorb more.

VS.

Competitive Wet Press Technology.
Packed fibers cause water to sit on the towel, delaying absorbency and increasing waste.
